

## C10 CURTAINSIDE

Pillars for Curtainside trucks

**C10** Curtainside pillar for vehicles with full side curtain. The pillar is made from high strength steel to comply with relevant requirements for securing loads. Single-handed operation for easy use.

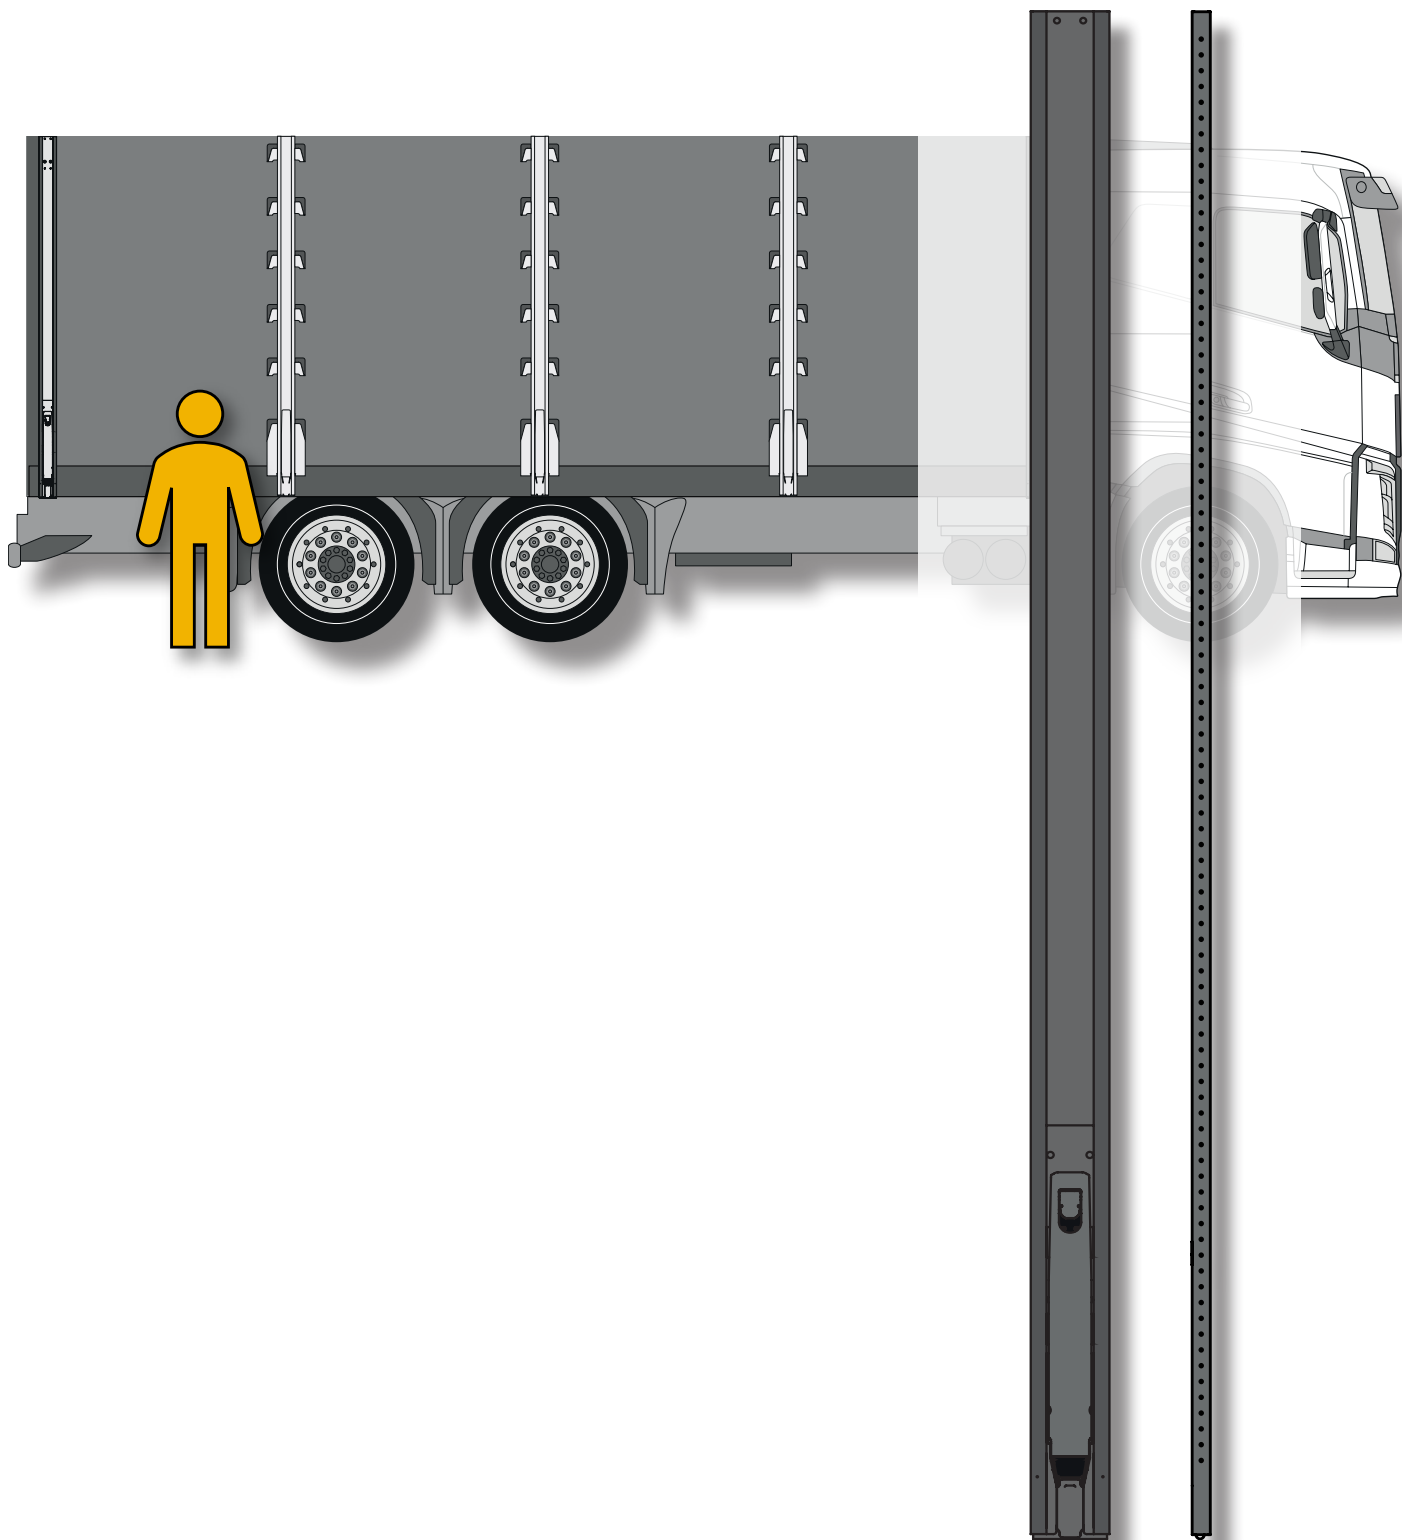

Pillar length can be adjusted from the ground. Accessories include telescopic top, fixed top and a roller to complete the range. Low-profile side rave supports are available in weld-on or bolt-on versions.

The system is used as a standard solution on most established trucks and has been tested according to EN12642.

- One-handed operation
- Flexible with combination options
- Easy movement of the pillar sideways through the roller construction
- Combination options enable change of pillar height
- Telescopic and fixed top for raising ceilings and weightless handling
- Low-mounted support allows low side raves
